

## Update on COVID-19 booster shots

**In case you missed it: If you or a loved one are 50 or older, or are moderately or severely immunocompromised, you can get an additional Pfizer or Moderna COVID-19 booster shot at no cost to you.**

The CDC recommends an additional booster shot for certain individuals to increase protection from severe disease from COVID-19. People over the age of 50, or who are **moderately or severely immunocompromised**, can get an additional booster of Pfizer or Moderna 4 months after their last dose. This is especially important for those 65 and older who are at higher risk from severe disease and most likely to benefit from getting an additional booster.
