Local Value Network enhanced with the addition of Summit Medical Group and Penn Medicine

Effective July 1, 2019, in addition to Children's Hospital of Philadelphia, our Local Value Network will offer EVEN MORE VALUE as we welcome Summit Medical Group for all segments and Penn Medicine for Small and Large group segments only. With this addition, our Local Value Network has over 90% overlap when compared to the Regional Preferred Network.

The AmeriHealth New Jersey Local Value network offers employers and their employees a more affordable cost structure by providing access to a subset of the Regional Preferred network in New Jersey.

With these new network enhancements, please look at quoting our Local Value Network in place of our Regional Preferred for the right customer to get to a better premium price point.

We're sure that this enhancement will help you better serve your customers.

If you have any questions, please contact your AmeriHealth New Jersey broker representative.
