Simplified collection process for MLR and MSP data

AmeriHealth New Jersey is required by federal regulations to collect Medicare Secondary Payer (MSP) and Medical Loss Ratio (MLR) data from our groups with 2-300 employees. In an effort to simplify the data-collection process and achieve an overall better customer experience, we are pleased to announce that we have combined the MLR with the MSP process by creating a single streamlined interactive online survey, which groups can use to submit their data directly to AmeriHealth New Jersey.

In the coming days, we will send a letter to these groups explaining the new process and directing them to visit www.amerihealthnj.com/groupsurvey for additional information and to submit their data. This letter will also be sent to groups who have not responded to a previous request for their MSP data.

A group customer’s failure to submit the data may result in receipt of a demand letter or the imposition of fines or penalties on the employer or AmeriHealth New Jersey.

If you have any questions, please contact your AmeriHealth New Jersey broker representative.
