

THE POWER OF A FULLY CONNECTED PHARMACY BENEFIT MANAGER

There are several new specialty medications coming to market to treat conditions like Hepatitis C and while some are considered groundbreaking the cost associated with all of them is substantial. Four percent of the individuals taking specialty medications represent **24% of total health care costs*** which is why it's so critical they receive comprehensive care and support.

Please join us to learn more about how a fully connected approach across pharmacy, medical, behavioral and disability services can help achieve superior outcomes, optimize personal and professional productivity and help drive affordability for the individual and the employer.
