

THE POWER OF A FULLY CONNECTED PHARMACY BENEFIT MANAGER

Cigna Pharmacy Management's integrated approach to pharmacy solutions connects people, information and benefit programs to help drive meaningful change in how pharmacy benefits are delivered and used.

Now we can offer this solution with more competitive pricing and lean plan design solutions for coverage and access to more effectively control cost. This package, combined with the value of our integrated approach, gives clients what they seek most: a pharmacy solution designed to improve savings, deliver better health outcomes, and increase satisfaction.

Chief among our differentiators is the foresight and ability to manage the surging use and cost of **specialty medications**, which impacts both pharmacy AND medical benefits.

Please join us to learn about what Cigna's PBM has to offer in 2015 and beyond.
