

THE OMNIA HEALTH ALLIANCE

What is it?

The OMNIA Health Alliance is a collaboration between Horizon BCBSNJ, six health systems and one multispecialty physician group who are working together to improve the way health care is financed and delivered in the state.

Who is involved?

Six health systems

- Atlantic Health System
- Barnabas Health
- Hackensack University Health Network
- Hunterdon Medical Center
- Inspira Health Network
- Robert Wood Johnson Health System

One multispecialty physician group

Summit Medical Group

When does it happen?

Every day. The old way was to treat people once they became sick or injured. Instead, the OMNIA Health Alliance is dedicating its expertise and resources to keeping people healthy every day. When they need care, it will be better, easier to use, and more cost-effective for New Jersey's health care system.

Where does it operate?

The health systems and physician group that will participate in delivering care as part of the OMNIA Health Alliance are located throughout the state.

How does it work?

The new model will focus on keeping individuals healthy and rewarding doctors and hospitals on meeting the following three goals:

- Improving the quality of care they receive when they need it
- Enhancing patient satisfaction
- Lowering the total cost of care

Why is it important?

Our aim is to make health care better and more efficient for all New Jersey residents. We can't do it alone. It takes a dedicated relationship with health care providers who share the same goal. That relationship is the OMNIA Health Alliance.

What are people saying about the OMNIA Health Alliance?

"The OMNIA Health Alliance is an important step forward in reducing the cost of health care in New Jersey while at the same time increasing the quality of care."

— Carlos Medina, Chairman, New Jersey Statewide Hispanic Chamber of Commerce
