

Delta Dental benefits are more attractive than ever for your 2-49 groups. Starting January 1, 2019, our coverage will include composite (a.k.a. white) fillings for all teeth, including molars.

White fillings mimic the appearance of natural teeth and help members feel more confident with their smiles. And, because the composite is flexible, less drilling may be required. ([Learn more](#) about composite fillings.)

This is just one more reason for your small business clients to choose Delta Dental. We offer great rates, benefits and flexibility – plus our best-in-class national network.
