
Get your flu shot

This flu season, **protect yourself and your loved ones by getting the flu shot.** It's the best way to protect against flu and its potentially serious complications. The flu can be very serious, especially if you're 65 or older.

[Flu shots are covered for people with Medicare](#), when you get it from a doctor, pharmacy, or other health care provider that accepts Medicare or your Medicare plan.

[Get Your Flu Shot](#)

Remember, flu and COVID-19 vaccines help protect you from different viruses. The flu shot reduces the risk of flu illness and doesn't protect against COVID-19. Likewise, the [COVID-19 vaccine](#) is the best protection against the COVID-19 disease and doesn't protect against flu. **Both vaccines, however, can be given at the same time.**

Visit [Vaccines.gov](#) to find [COVID-19](#) and [flu vaccines](#) near you.

Sincerely,

The Medicare Team
