

Optum ID login process on oxfordhealth.com for brokers and employers.

As communicated earlier this year, we are implementing a new enhanced login ID, "Optum ID," for brokers and employers on your [oxfordhealth.com](https://www.oxfordhealth.com) websites.

On **Aug. 25, 2018**, Oxford ID login credentials will no longer be recognized on the Broker and Employer websites. Users will be required to log in with their Optum ID credentials.

If you have not already registered for Optum ID login credentials, please do so before Aug. 25, 2018, to avoid interruption in your website access.

How it works.

The new enhanced login ID increases security and provides account recovery functionality. It also provides the ability to use only one username and password when accessing our other websites powered by Optum ID.

When accessing the [oxfordhealth.com](https://www.oxfordhealth.com) Broker and Employer websites, users will see the message "Log in with your Optum ID" on the main login page.

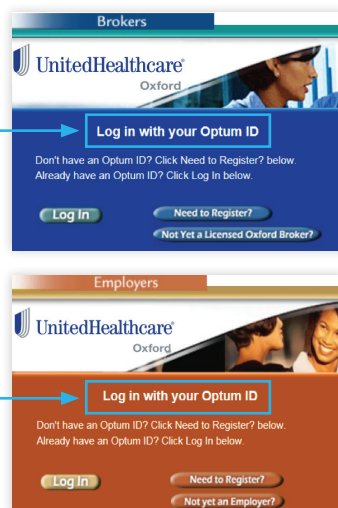

If you already have an Optum ID, click the "Log In" button to proceed onto the website.

If you do not already have an Optum ID, click the "Need to Register?" button and follow the prompts to complete the process.

Note:

- If using the Optum ID for the first time, a registration process will still need to be completed on [oxfordhealth.com](https://www.oxfordhealth.com). Instructions will be provided once you enter your username and password.

This process does not impact the [oxfordhealth.com](https://www.oxfordhealth.com) Member, Provider or Facilities websites at this time.

Intuitive registration

sign-in and account recovery.

Optimized for all devices

smartphones, tablets, laptops
and desktop computers.

Enhanced security

that authenticates the
user and provides access
to eligible websites.
